## Judy Greenspon, NPI Services, Inc. Founder and President, Featured in UCI Entrepreneurial Series

The Henry Samueli School of Engineering at UC Irvine featured NPI Services, Inc. Founder and President Judy Greenspon last Thursday in its Entrepreneurship for Scientists and Engineers Seminar Series. This series brings the realities of the business world into the classroom. While the series is part of a course on Entrepreneurship for Scientists and Engineers, the public is welcome to attend free of charge!

## New USB Type C Scores an A+ at NPI Services, Inc. (January 21, 2015)

Part of the excitement at NPI Services, Inc. is serving clients that are industry leaders using the latest developments and components. Currently we have a project using the new powerful and user-friendly USB Type C connection. Users of type C cables and connectors will no longer need to keep track of which way is up nor which end is which! This convenient symmetry combines with speed and unsurpassed functionality, and it is compact enough for ultra-thin modern devices. Bidirectional communications, charging, control, power management, and power delivery are all supported by full-featured Type-C connectors, eliminating a multiplicity of cabling.

The USB Type-C Cable and Connector Specifications Revision 1.0 were released August 11, 2014. Our client was one of the firms which contributed to the specification work group. Visit <http://www.usb.org/developers/docs/> to download the Universal Serial Bus (USB) Revision 3.1 Specification zip file, which includes Type-C Cable and Connector Specifications.
